DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Allowable Subject Matter

2. Claims 20-24 are allowed.
3. The following is an examiner's statement of reasons for allowance: Applicant's arguments filed May 29, 2007 are persuasive. The Rautilia and Kagan references, in combination, fail to teach a method of configuring a subscriber unit for operation in a wireless communication system, comprising the steps of, at the subscriber unit, obtaining over a broadcast RF sub-carrier of a commercial FM broadcast station communication information necessary for the subscriber unit to automatically communicate with a brokering agent that provides automated brokering services for a plurality of wireless service providers, and using the communication information to communicate to the brokering agent the identity of the particular wireless service. No

Art Unit: 3691

prior art of record, either alone or in combination with any other applicable prior art teaches these limitations.

The Dokken reference has been cited for its teaching of a subscriber device communicating with a network using FM sub-carrier frequencies. Dokken teaches receiving communication information over an RF sub-carrier of a commercial FM broadcast, but fails to teach using the communication information to communicate anything back to a brokering agent.

The "iBiquity" article has been cited for its teaching of wireless services over FM communication broadcasts. However, the reference fails to teach using received over an FM broadcast to communicate to a brokering agent the identity of the particular wireless service.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
